TECHNICAL SKILLS

- Core Languages: JavaScript (ES6+), HTML5, CSS3
- Libraries & Frameworks: React.js, Node.js, Express, Vite
- Tools & Workflows: Git Version Control, Windows System CMD, REST APIs, Vercel

SELECTED TECHNICAL PROJECTS

Starehe Admissions Portal

- Developed a specialized web application using React.js, optimizing dual-stream enrollment pathways and complex institutional ranking logic.
- Implemented conditional data validation rules for the front-end user forms, ensuring accurate data tracking for the student transition portal.

Git Searcher Application

- Developed a responsive Git Searcher dashboard in React and Vite that integrates with the external GitHub REST API to fetch and render real-time profile data dynamically.
- Engineered live state logic to parse and display user bios, follower metrics, location data, and structured listings of popular repositories.

EDUCATION & TIMELINES

- Full-Stack Software Development Program | Starehe TTI (Ongoing)
- Global Communication Tracker: Intensive Spanish Language Journey (Targeting DELE/SIELE B2 Fluency)
